WORK EXPERIENCE

Wisent

Software Engineer

Oct 2025 - Present

- Developed AI-powered chat and agent capabilities across **frontend** and **backend** services by integrating **3+ LLM providers and platforms**, including **OpenAI, Google Gemini, and OpenRouter**, with model routing, fallback handling, evaluation workflows, and structured prompt orchestration.
- Built a **frontend** data translation layer that mapped backend **API** responses to stable **UI** models, minimizing frontend changes when **backend** schemas evolved.
- Replaced brittle text-pattern matching of **LLM** responses with structured intent tags, enabling deterministic application logic despite output drift across different models and providers.
- Identified cross-timezone reliability risks and designed a UTC-based timestamp strategy with timezone-aware conversion for consistent time handling across frontend and backend services.
- Designed and built **QA** framework across mobile, backend, and AI services — defining 35+ risk-based testing capabilities and 200+ deterministic invariants that uncovered 11 confirmed production defects.

Tristyn Tech

Web Developer (Contract)

Mar 2025 - Aug 2025

- Developed end-to-end **full-stack** features from PRDs and **UI** designs, implementing **frontend** interfaces and **backend** functionality using **React, JavaScript, CSS**, and Firebase.
- Implemented React Context to manage shared state across 3+ levels of nested dashboard components and modals, reducing prop drilling and simplifying component communication.
- Improved accessibility by implementing keyboard navigation and screen-reader support in alignment with **WCAG** guidelines.

CERTIFICATIONS

University of Texas at Austin — Center for Professional Education

Full Stack Web Development Bootcamp Certificate

EDUCATION

Texas State University

Bachelor of Music in Jazz Studies

SKILLS & INTEREST

Languages: JavaScript, TypeScript, Python, Java

Frontend: React, Next.js, Angular, CSS, HTML, Tailwind, Bootstrap

Backend: Node.js, Express, Spring, RESTful API, FastAPI

Databases: PostgreSQL, MySQL, MongoDB

Others: Git, Agile, AWS

Interest: Piano, Guitar, Woodworking, Cardistry
