Work Experience

Wisent – Mobile App Developer

Oct 2025 - Present | Early-Stage Startup

- Implemented a data translation layer between backend APIs and React Native components, decoupling frontend data models from backend schemas and enabling API migrations with minimal UI changes.
- Integrated OpenAI and Google Gemini APIs by building a provider abstraction layer that enables runtime switching and automatic fallback between providers to maintain service reliability.

Tristyn Tech – Web Developer (Contract)

Mar 2025 - Aug 2025

- Developed features using React and JavaScript in an Agile team environment, integrating REST APIs and implementing responsive UI designs for cross-device compatibility.
- Implemented React Context for global state management, simplifying data flow and reducing prop drilling across multiple components.
- Enhanced **accessibility** with improved tab navigation and screen-reader support (**WCAG** compliance).

Tristyn Tech – QA Tester (Contract)

Jan 2025 - Mar 2025

- Designed and executed **QA** test scenarios that uncovered a session-isolation defect where user data could persist across authentication changes, preventing potential sensitive data exposure before release.

Personal Projects

Music Hub – A music community platform with forum features

TypeScript, React, [Next.js](#), Python, Node.js, PostgreSQL, OpenAI API

- Leveraged Next.js server and client components to balance SEO and dynamic UI updates, using server-side rendering for discoverable content and client-side rendering for interactive features.
- Developed a **Python** background worker to automate daily forum topic generation, scheduling OpenAI **API** calls to create music-theory discussions.

QA-Report App – Built to improve QA testing efficiency at Tristyn Tech

JavaScript, React, Node.js, Express, MongoDB, Google Cloud Platform

- Built an internal QA reporting tool using React and Node.js that allows testers to upload screen recordings and bug descriptions, helping developers diagnose issues that are difficult to reproduce.

Certifications

Full Stack Web Development Bootcamp Certificate

Center for Professional Education (The University of Texas at Austin)

Completed full-stack training in modern JavaScript, REST APIs, databases, and deployment practices.

Skills

JavaScript, TypeScript, React, React Native, [Next.js](#), HTML, CSS, Tailwind, Python, Node.js, Express, PostgreSQL, MongoDB, MySQL, Firebase, Sentry, Better Stack
